HIGH LINE
PARADIS I
NEW YORK CITY

FOTO: ARE CARLSEN

Med enkle midler har arkitektfirmaet Diller Scofidio+Renfro skapt et helt nytt landskap i New York City.

With a few simple elements, architects Diller Scofidio+Renfro have created a new landscape in New York City.

Plantevalget er basert på den selv-seidde vegetasjonen som vokste fram mens High Line var i bruk.
The choice of plants is based on the self-seeded vegetation that appeared while the High Line was disused.
