NU : erhvervshavnen adskiller byen fra fjorden

FREMTID : engen føres tilbage til byen

By og byen kobles centralt til havnen og fjorden

NU: eksisterende attraktive boliger ligger tilbagetrukket fra offentligt engområde

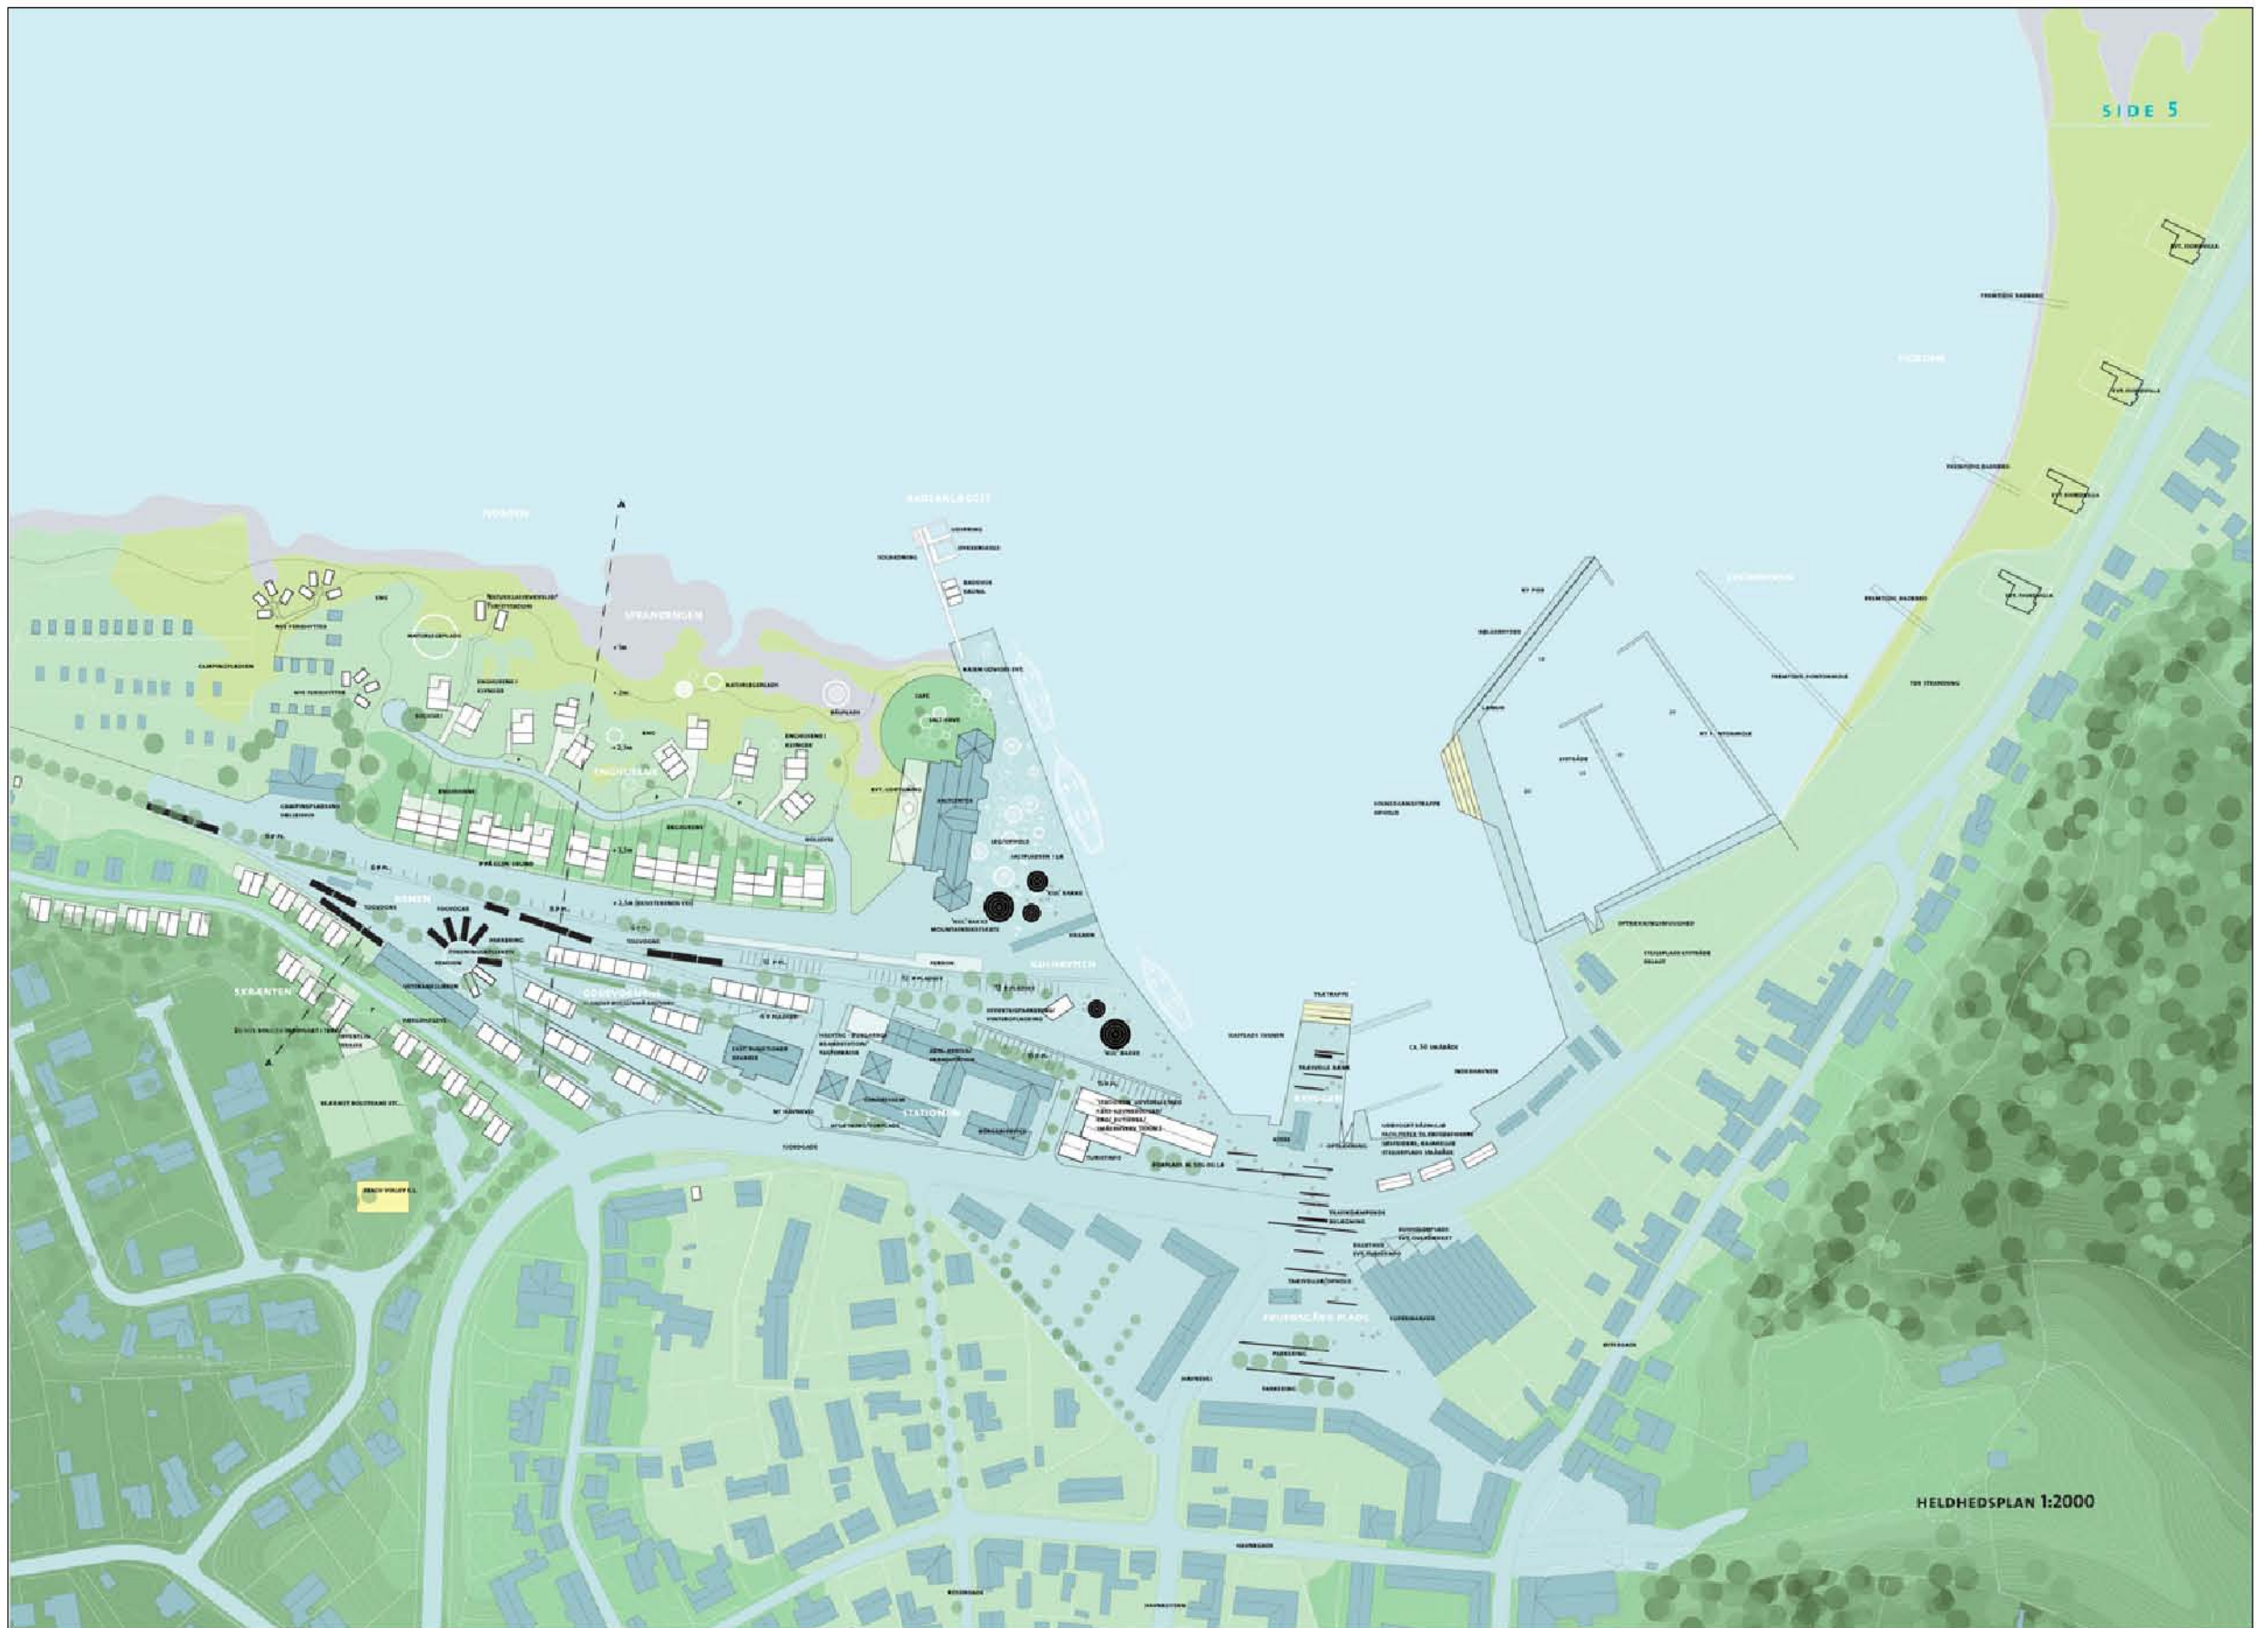

FREMTID: forsættelse af bebyggelsesstrukturer som respekterer strandengen

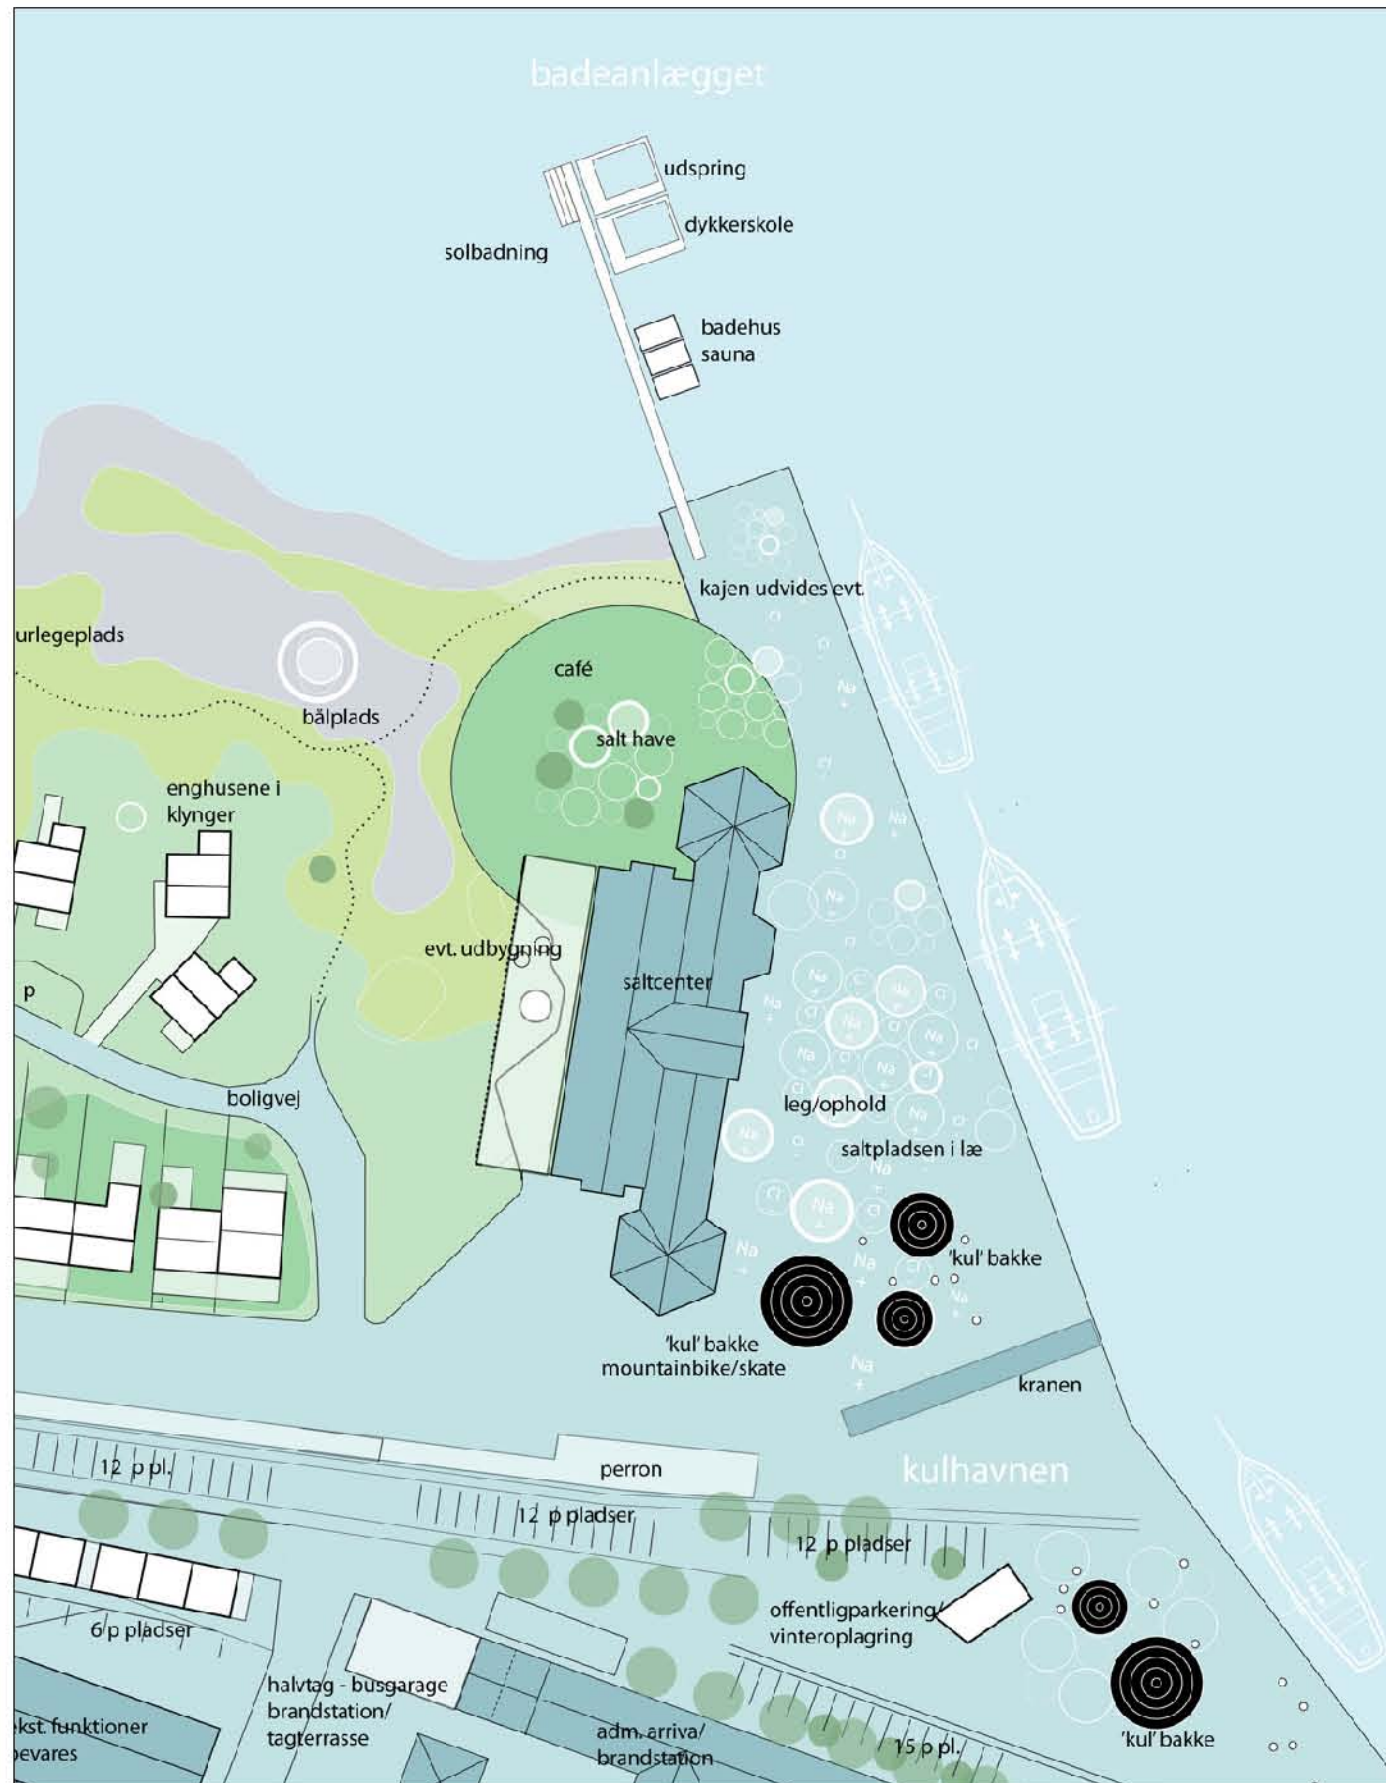

analyse: byen på fladen

kystlandskabet år 1900, hvor strandeng møder by

PROCESS

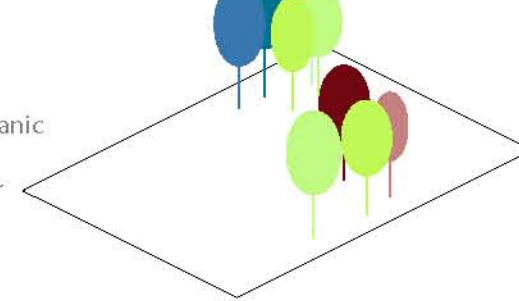

ANIMALS

Hens, rabbits, sheeps, goats, horsetracks and dogwalking-areas are all different elements which can be adjusted easily to city life and city landscapes. Recent studies show that people who lives among animals have a better quality of life.

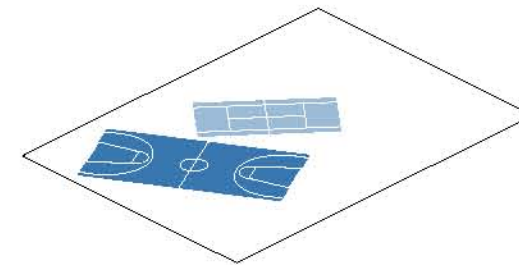

BOTANICS

Hence these parkareas are to be super-artificial, the Matrix of Progress holds botanic programmes instead of biotopic dreams. We suggest that the botanics are used for orientation, contemplation and beauty.

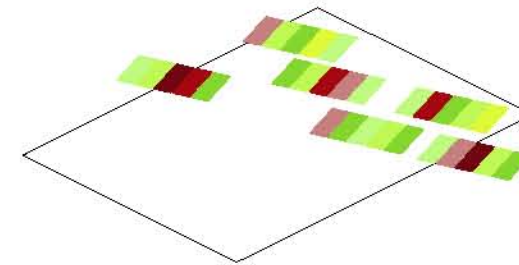

SPORTS

Different sorts of sport programmes with easy access.

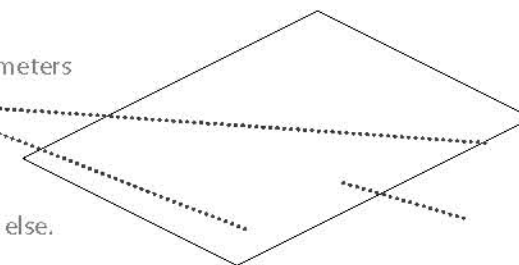

ALLOTMENTS

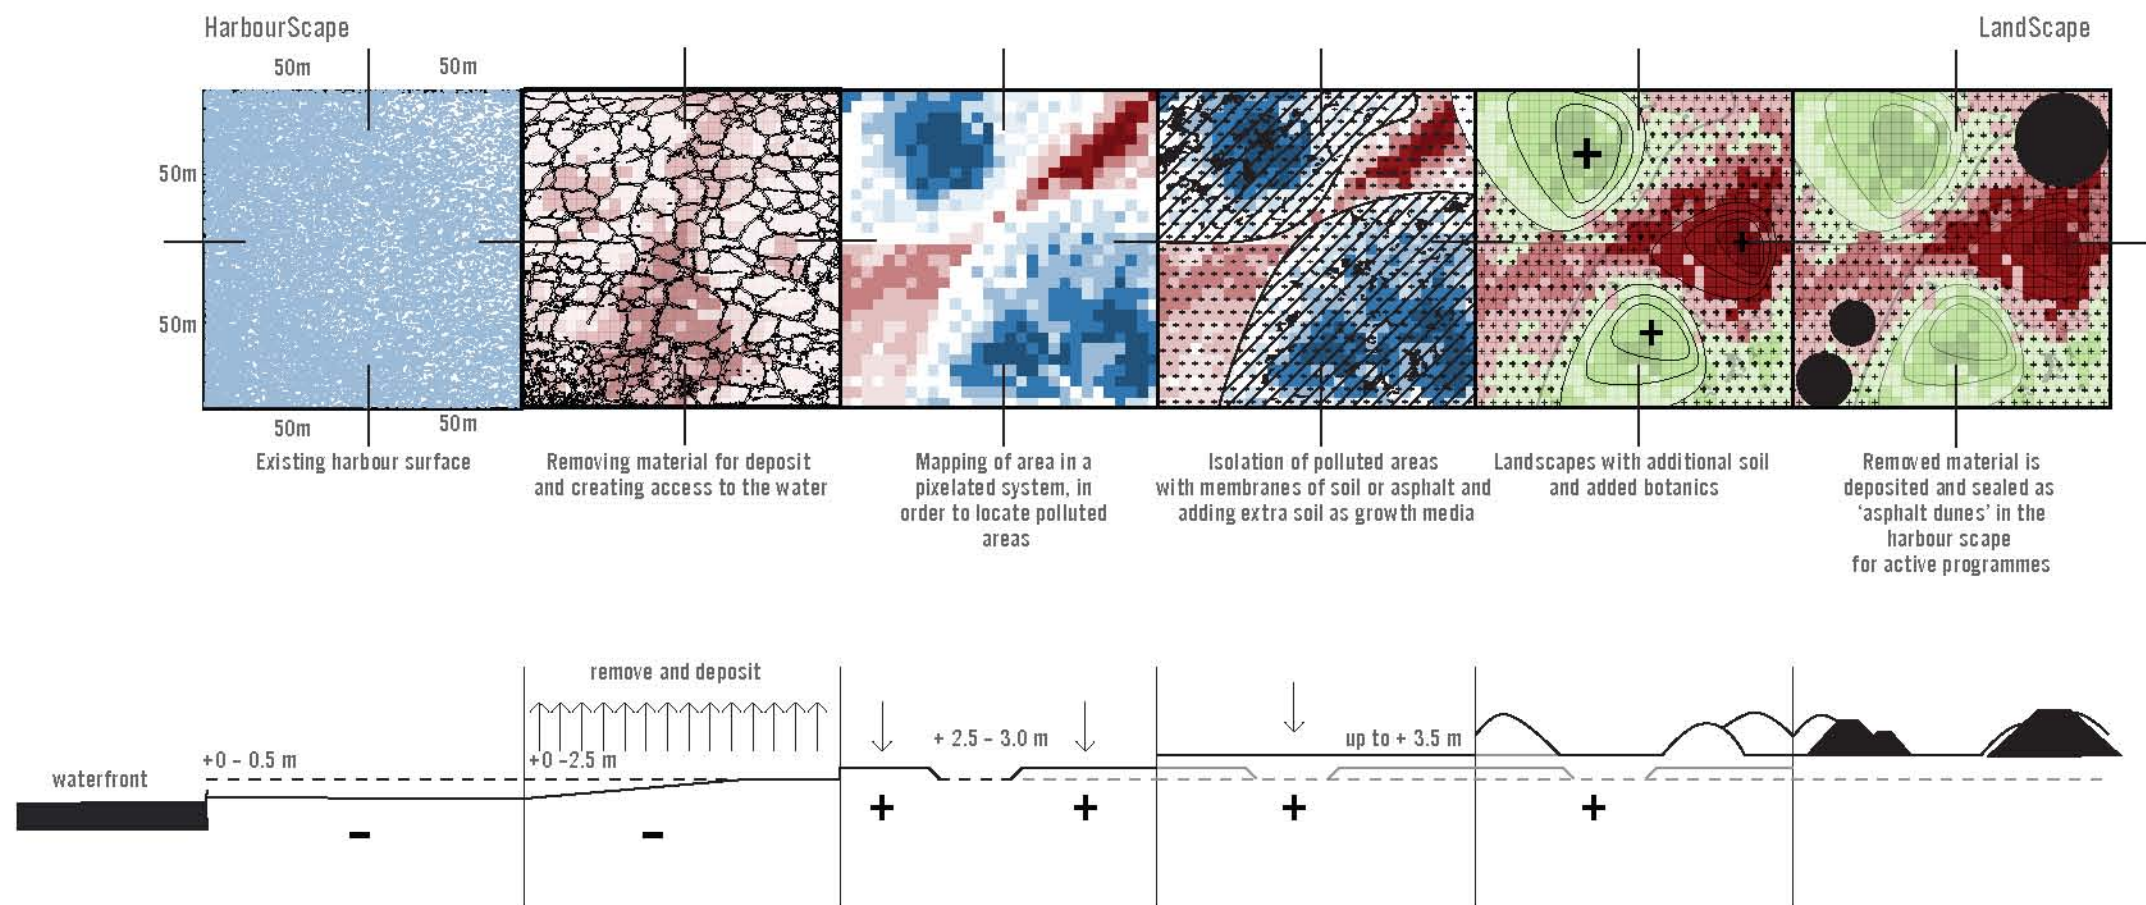

MIKADO ACCESS

Hence the parkareas are raised up to 1,5 meters above the general level, one needs access for the water. These direct lines that support the new urban fabric will guide the way and lead straight to the water for the handicapped and everyone else.

Established in 1536, a central renaissance square in Malmö. The precise geometry is in great contrast to the surrounding narrow, scrolled medieval city.
The exposed facades are the main element of the square.

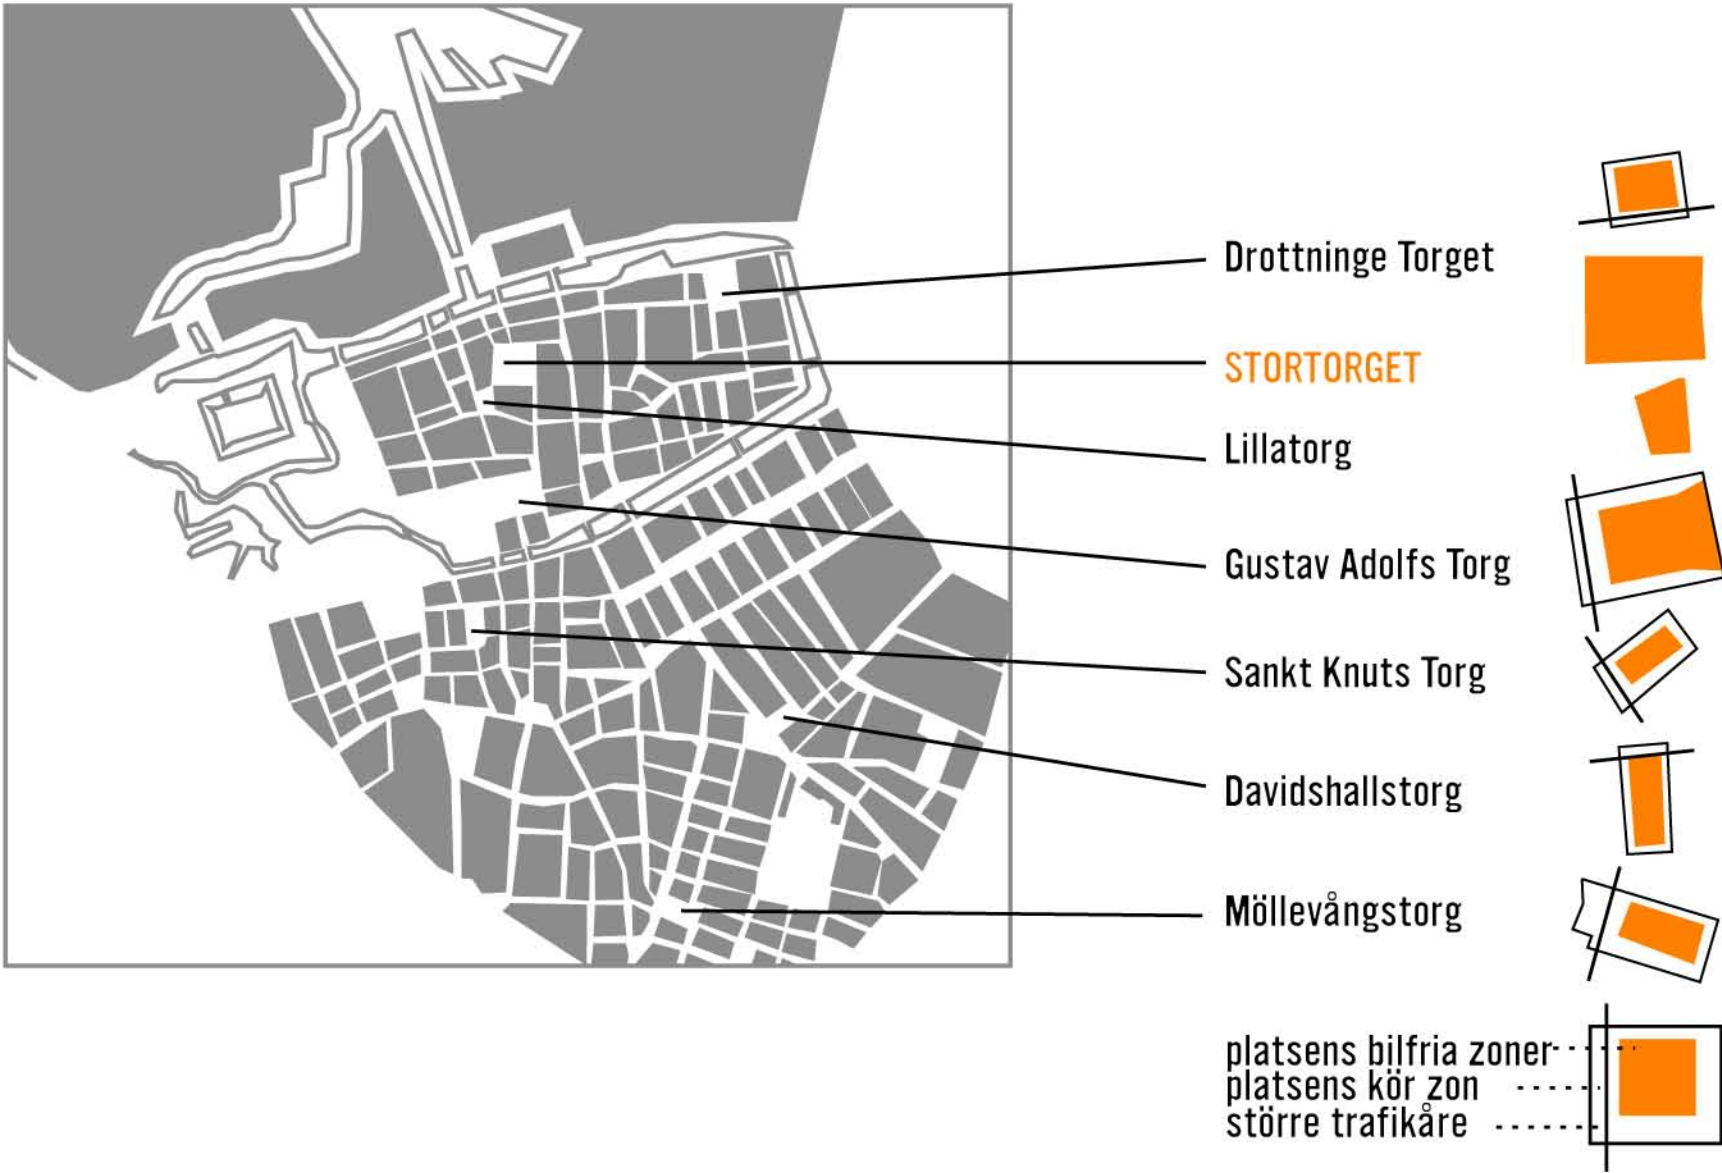

Malmö city is growing, both harbour and railways are expanded. The role of the Main Square is changing. A central roundabout with a night, King Karl X Gustav is the focus of the square—the facades no longer defines the square

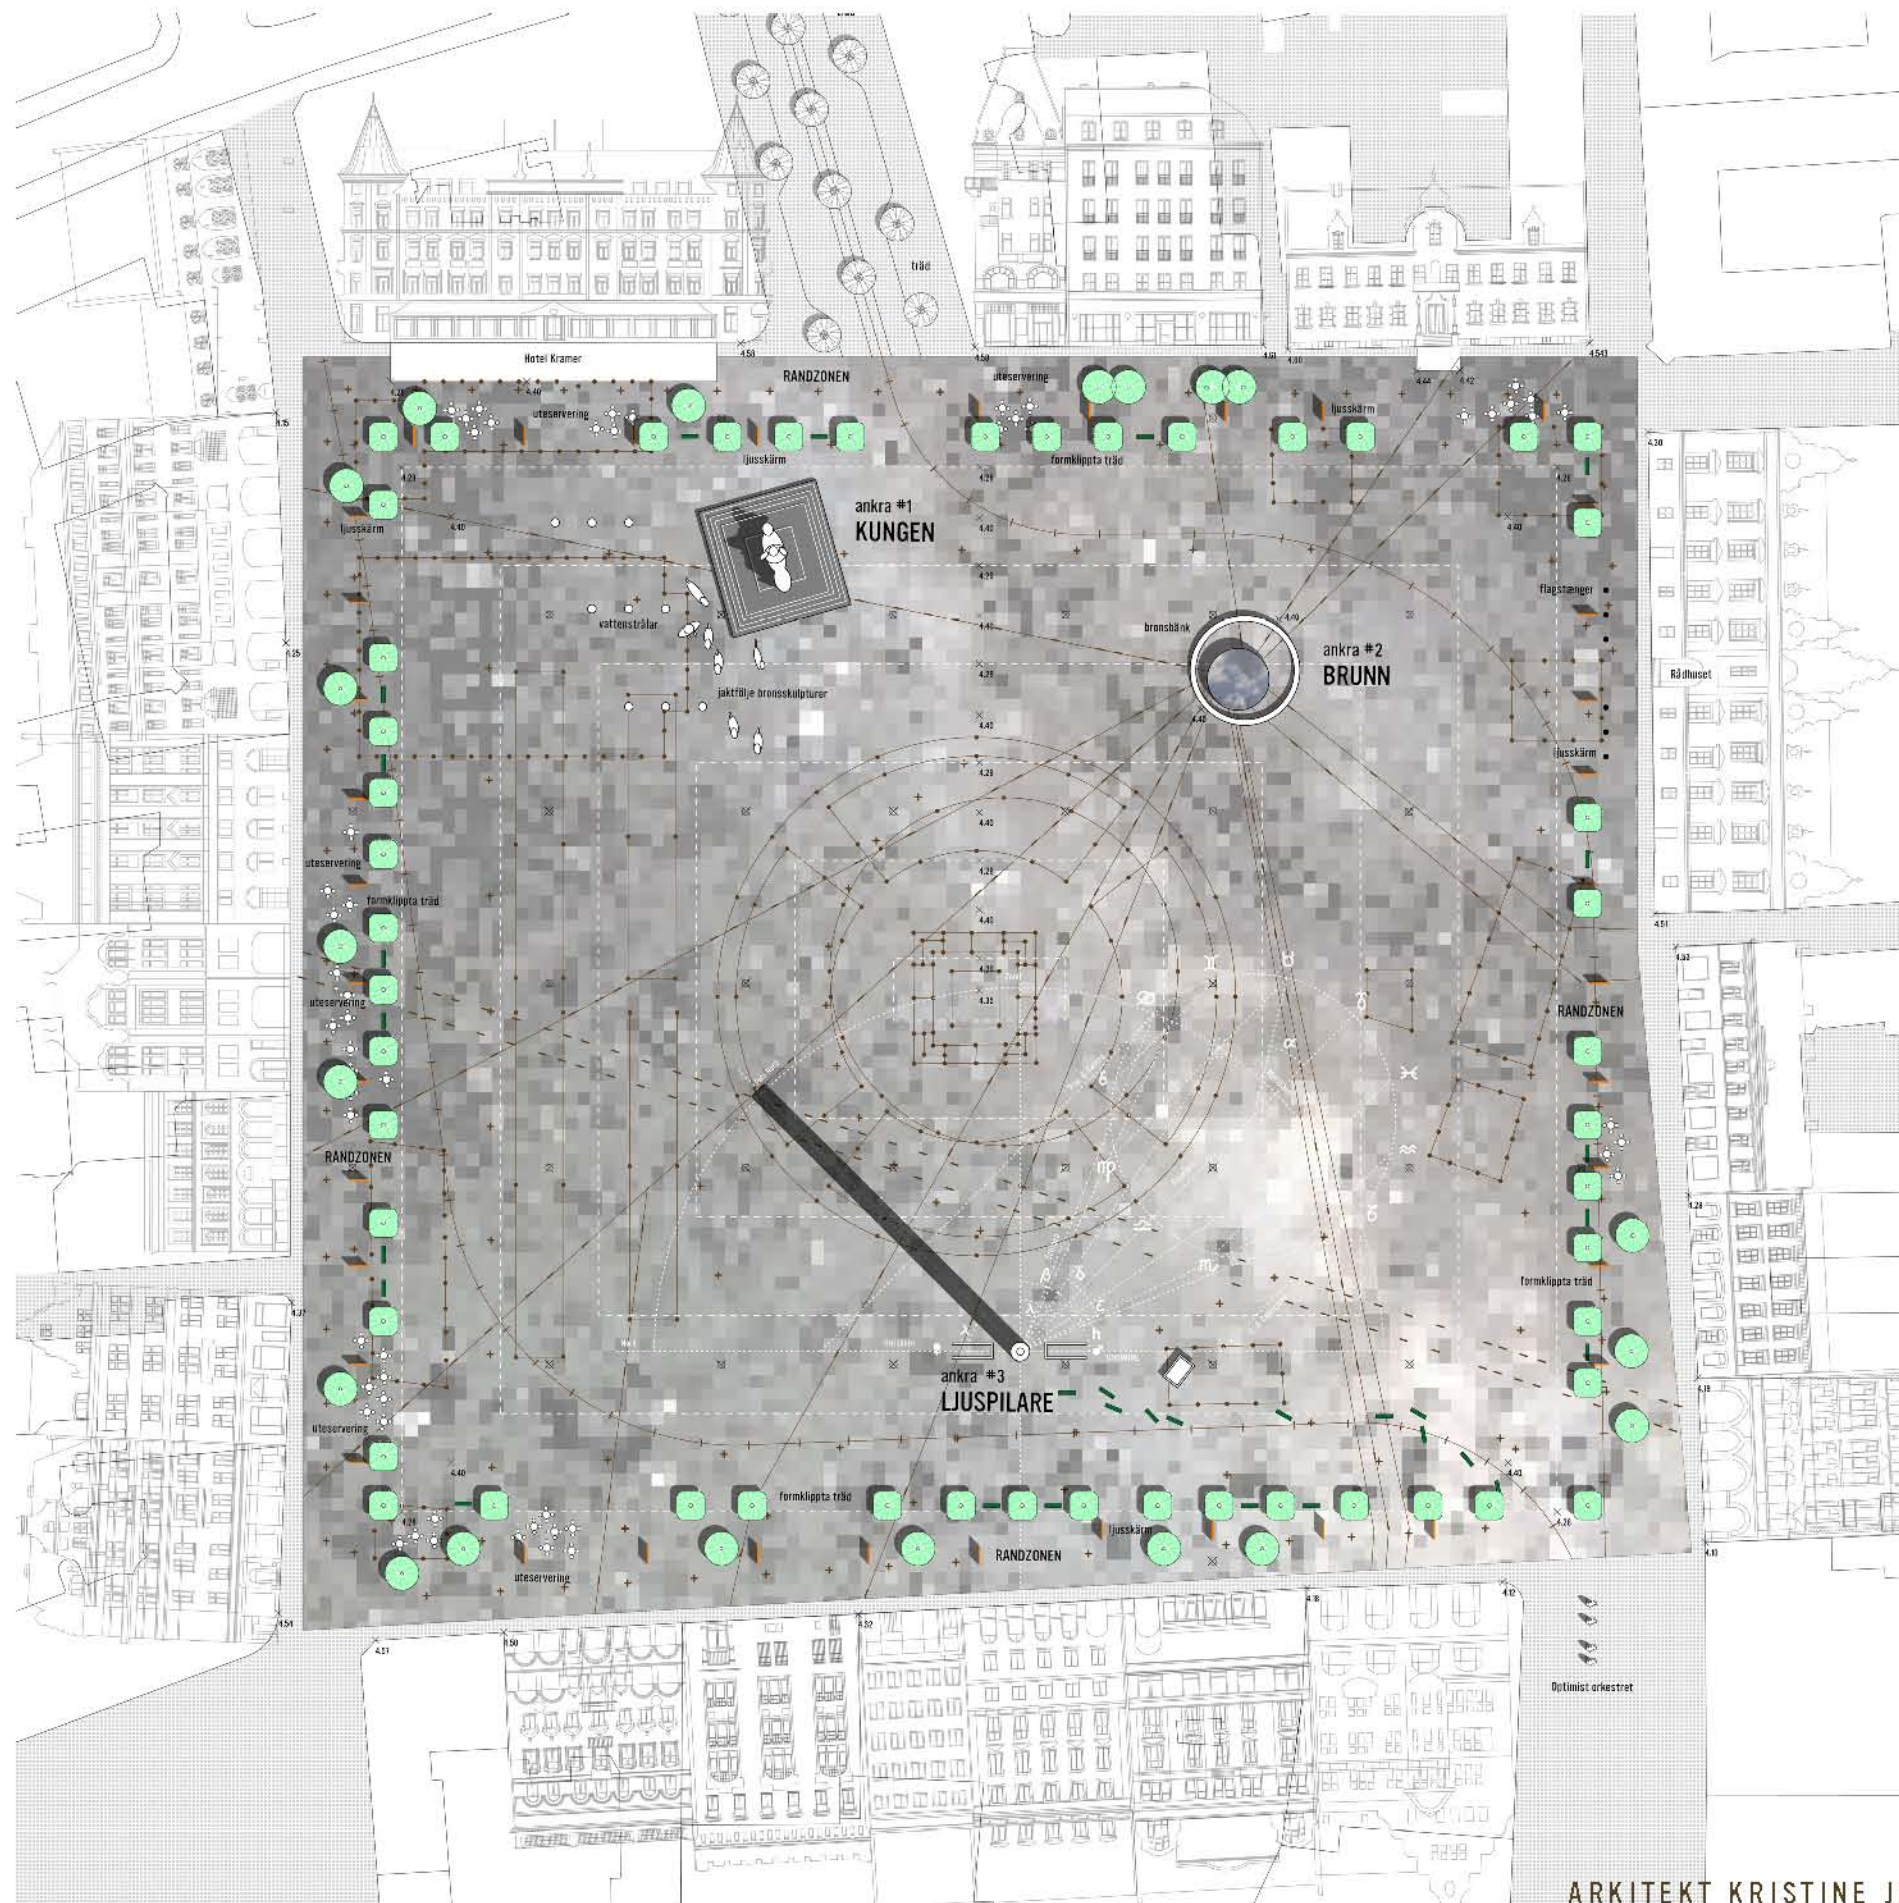

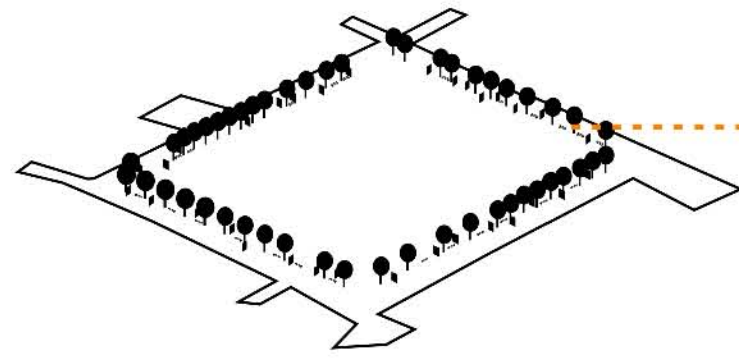

The Main Square has become a square among many squares. It is lacking clear function and identity to be different from the many squares. The historical layers creates an unclear confusing situation on the square. It is still the largest urban space, but the original greatness has disappeared.

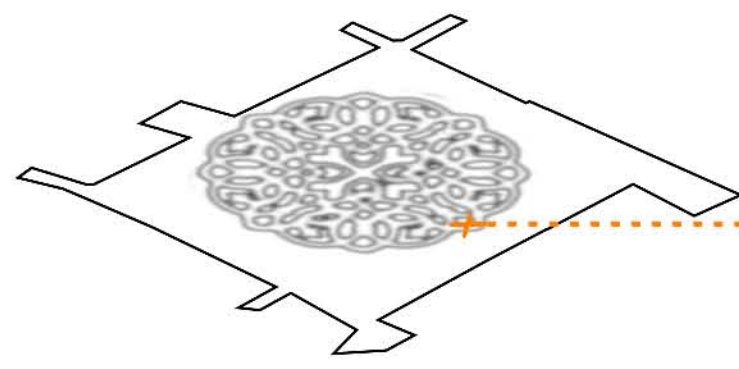

The Main Square should become the central city square, a link between the new harbourcity, the medieval city and the rest of Malmö.
The facades should frame the square. A place of everyday life and of celebration.
